

Op-Art Pinwheel Template

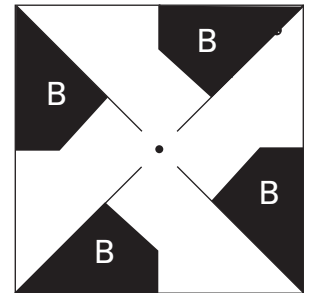

Pattern Guide

Front

Back

Instructions:

1. Print and cut out the template. Cut along the solid lines making sure to stop short of the center as shown.
2. Decorate the triangular areas labeled "A" as defined by dashed lines and shown on the pattern guide
3. Turn over and decorate the areas shown as "B" on the pattern guide.
4. Punch a hole through the black "B" circles and one through the center of the pinwheel.
5. Trim your skewer to be 2 1/2" long. Pierce the straw about 3/4" from the top, leaving about 1/4" visible on the back side of the straw.
6. Place a wood bead on the skewer.
7. Thread the pinwheel onto the skewer through the center hole with sides "A" facing up. Gently fold and thread each "B" flap through the skewer.
8. Thread a bead onto the end of the skewer and secure in place with hot glue. The bead should be at the end of the skewer leaving plenty of room for the pinwheel to move.
