

holiday flexagon

Instructions:

1. Print template on cardstock.
2. Cut along bold line.
3. Crease dashed lines face to face. Unfold.
4. Crease diagonal lines back to back. Unfold.
5. Gently fold paper to match dot to dot and form a tube.
6. Add glue on tabs marked GLUE and press together.
7. Add glue on end tabs and tuck into open end of tube. Press to seal. Add tape to secure together if necessary.

TIPS:

If your images appear disjointed flip the flexagon over and view from the opposite side.

Prime your flexagon by rotating it gently and pushing out unwanted folds. Rotating it a few times will loosen it up.

Be sure to crease the folds well. Drag the back of your fingernail along the folds to make them crisp.

If the end tab pops out, add a small piece of tape on both sides of the joint.

Make sure the glue is dry before rotating your flexagon! The glued joints will be under stress so they need to be secure.
