

zippy zoomer template

© www.babbledabbledo.com

instructions:

1. Cut out front and back strips.
2. Tape each strip into circle. Use the dashed line on the template as a guide.
3. Cut paper straws to be 5 1/2" long. If you do not have straws see optional paper tube directions.
4. Hot glue three straws to the outer edge of the back circle at the dotted lines. The fourth straw should be glued at the point where you taped the circle together.
5. Glue the other end of the straws onto the outer edge of the small circle at the dotted lines. **Align the taped starting point of both circles to make sure your zoomer isn't twisted!**
6. If desired, decorate your zoomer with washi tape or markers.
7. Optional: If you don't have straws you can make paper tubes. *DO NOT make paper tubes out of card stock, it is too difficult to bend. Make them out of paper only.* Cut out the paper tube section on the template. Wrap it tightly around a pencil then unfurl and cut out each individual tube. Roll one of the tube sections around a pencil again and tape to hold it together. Repeat to make (4) tubes total. NOTE: These are a bit heavier than straws so they do add some weight to the zoomer.

paper tubes
(optional) Use in lieu of straws
