

#### Paper Village SVG Instructions:

1. Import the SVG file into your smart cutting software.
2. Set all layers (except for the yellow layers) to “score” instead of “cut”. (Make sure the yellow layer is set to “cut”).
3. Select the whole template and click “attach”. Now you can resize as desired, or leave as is.
4. Then click “make it”.
5. Make sure your scoring stylus is in your machine.
6. Set the paper size to 8.5” x 11”
7. If using PrintWorks Glitter Cardstock, make sure the glitter side is facing up!
8. Now you can press “go” to cut out your design!

#### Importing the signs:

1. Import the signs as a “print and cut” image into your smart cutting software.
2. Once uploaded, set the width of the image to 5 inches to make sure it cuts out at the correct size.
